

Enhance Your Hemophilia Treatment Program with a Customized Nutrition Program

The Problem:

- **Hemophilia medications can cause debilitating side effects**
 - Desmopressin (DDAVP) can cause fluid retention, increased blood pressure, flushing and headaches.
 - Antifibrinolytic Agents (Amicar, Cyklokapron) can cause GI discomfort, low blood pressure, flushing and headaches.
 - Clotting factors may cause various viral infections that decrease your immune system function
- **No hemophilia treatment program targets symptom reduction**
 - Primary treatment does not address bruising, joint pain and inflammation, fatigue, poor bone health and avoidance of viral and bacterial infections

The Solution:

- **Introducing advanced custom nutrition from ChronoMed!**
 - Vitamin programs custom tailored to your hemophilia needs
 - 25% less expensive than comparable products sold at retail
 - Ingredients and dosages backed by thousands of scientific studies
- **Reduces medication side effects**
 - Restores depleted nutrients caused by medications used to treat Hemophilia
 - Supplies nutrients to strengthen immunity
- **Provides symptom reduction**
 - Decreases bruising, joint pain and inflammation, fatigue and poor bone health
 - Replenishes nutrients known to allow hemophiliacs to maintain an active lifestyle

The Offer:

- **A special Invitation for NewLife Home Care patients**
 - Go to http://newlifehomecare.com/news/61st_annual_meeting/ to receive your access code for your free assessment.
 - Complete assessment and submit for confidential ChronoMed medical review
